H.W. Wilson Announces the 23rd Edition of Sears List of Subject Headings

Since the first edition in 1923, the *Sears List* has served the unique needs of small and medium-sized libraries, suggesting headings appropriate for use in their catalogs and providing patterns and instructions for adding new headings as they are required. The goal of this new edition is to make library collections as easily available as possible to library users.

The **Principles of the Sears List**, which follows **A History of the Sears List**, is intended both as a statement of the theoretical foundations of the Sears List and as a concise introduction to subject cataloging in general. **The List of Commonly Used Subdivisions**, which follows the Principles, lists, for the purpose of easy reference, every subdivision for which there is a provision in the List, no matter how specialized. For every subdivision there is also an entry in the alphabetical List with full instructions for the use of that particular subdivision. There are also many examples of the use of subdivisions, emphasizing that the use of subdivisions is an essential method of expanding and adapting the List to a library's particular needs.

The *Sears List of Subject Headings* is also available as a database and as MARC records for direct integration with a library's ILS.

The Essential Resource Features:

1. **Easy-to-use thesaurus-like format**, with an emphasis on subject terms that makes sense to catalogers
2. **Helpful guidance** on which subject terms to use for thousands of categories of information
3. **Helpful notes** outlining USED FOR, SEE ALSO, BROADER TERM, NARROWER TERMS, and RELATED TERM
4. **Scope Notes** to clarify the specialized use of a term or to distinguish between terms that might be confused

5. Accompanying list of canceled headings and when applicable, their replacements
6. Complete inclusion of headings from the final (6th) edition of the ***Sears List of Subject Headings: Canadian Companion***
7. All headings are **RDA compliant**

New to This Edition:

Always keeping in mind the ultimate goal of meeting the changing needs of library users, this edition includes hundreds of new subject headings corresponding to current literature and cataloger expectations, with a particular focus on expanding terms in the areas of:

- Computer Science
- Current Events
- Diversity
- Literature Genres
- Music
- Pop Culture
- Science
- Technology

It is only by being flexible and expandable that *Sears List* has been able over the years to fill the needs of a wide variety of libraries around the world.

The *Principles of Sears List* is included in this volume, outlining the theoretical foundations of the *Sears List* and providing a concise introduction to subject cataloging in general. This introduction is recommended reading about the fundamentals of subject cataloging.
